To whom it may concern,

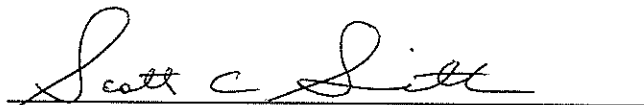

I've certainly enjoyed hiring Kelsey Cameron as an intern for the summer of 2015. Throughout her internship, Kelsey has learned how to create an SQL Android database, how to create 3D CAD Designs in Pro Engineer, and many other facets of IT.

By harnessing the knowledge of Northrop Grumman and each employee, she learned a variety of skills including how to code time-efficient Java programs, and how to use different types of software in IT – Sharepoint Designer, Crystal Reports, and ASC (Automated Systems Contracting). In each of these areas, Kelsey applied her knowledge of researching, and solving specific problems. She carried out many analysis's of reports, and sorted them all in an excel spreadsheet. Whenever any employee needed assistance, Kelsey helped them to the best of her ability.

Kelsey's bright personality lifted the office atmosphere, and I have the utmost confidence that she is capable of finishing any task that is given to her in her field.

I'm sure she will grow into an effective Systems engineer, making the necessary connections between software and hardware in order to create a product out of an idea.

Sincerely,

A handwritten signature in black ink, reading "Scott C. Smith", is written over a horizontal line.
